THE ELECTRIC REVENUE FROM 56,000 HOMES

**PAY OUR** 

Is Required to

THIS Company's taxes for 1930 amounted to more than \$1,900,000, equivalent to more than 11 cents of each dollar of gross revenue. The revenue received for electric service to the average

home was approximately \$35.00 for the year. This means that to pay the steadily growing taxes assessed against this Company takes the entire electric revenue received

from a full years service to 56,000 homes. Few people realize what a large part taxes are in the cost of electric service. Yet-this fact stands out: Despite increases in taxes and

other costs, the average kilowatt hour cost of electricity in the home using this company's service has steadily declined in the past five (5) years. In 1926 the average home electric rates were 37.1 per cent higher than for year ending October, The decline in

average rates paid by he users of domestic electricity when comared with the rise in his Company's tax payments per dollar fords a striking contrast, as this chart clearly shows.

Administrator.

## THE HOUSE OF INSPIRATION

Labeled Religion—isolated in a Church—and dismissed as impractical,—that happens too often to the noble,—the beautiful and the ideal way of life to which all men aspire. Why man should avoid and disparage that which he secretly holds sacred is inexplicable. The idea that religion is weakning, unmanly and impractical is absurd.

Come to Church. See, hear and talk with those who find great joy and comfort in religion. Know those successful people to whom religion is a practical —and enjoyable—and a profitable way of life. Come to Church—the symbol of inspired religion. The house of inspiration within whose walls only is to be found true happiness, spiritual joy and peace.
